Access
BY STORABLE

THE CHALLENGE

Dated and counter-productive solutions. As an operator, one of your main concerns is the security of your facility. Making an effective, secure way to control who can access your facility and when is more than a nice-to-have, but a must-have. Knowing its importance, you also know that current Access Control products are dated, cumbersome, and disruptive to operations. Whether it's the hassle of having to access a computer on-site or troubleshoot the system physically, it all adds up to headaches, lost-time, and degraded operational efficiency.

THE SOLUTION

A modern, efficient option. Out-of-date solutions don't cut it in an era driven by technology and automation. Not when your bottom line is on the line. As an operator, you know your time is more valuable when focused on day-to-day operations, improving tenant experiences, and maximizing revenue. To achieve the success and operational efficiencies you desire, you need a centralized Access Control solution that seamlessly integrates with your management software and existing workflows. Above all, you need a solution that empowers you to control it from anywhere at any time.

THE STORABLE APPROACH

Powerful integration. Storable believes in empowering you to configure and manage your Access Control solution the same way you're already running the rest of your business – with your facility management software. Through the power of seamless integration, you can manage your program remotely, utilize tenant data to inform tenant permissions, and contact a single support team to ask questions or troubleshoot issues.

ENHANCED OPERATIONAL EFFICIENCY
by managing, configuring, and troubleshooting your Access Control program anywhere, anytime from your facility management software.

SIGNIFICANT TIME SAVINGS
through a single support team with expert knowledge to help troubleshoot any issues across the Storable Platform.

OPTIMAL TENANT EXPERIENCE
by automatically granting tenants access to specific facility areas and guiding delinquent tenants to make payments when access is denied.

WITH STORABLE ACCESS

Access Control by Storable
Capability Overview

Access Control by Storable delivers an experience that's simple, reliable, and easy to manage. So you can focus on what matters – elevating your business.

SEAMLESS SOFTWARE INTEGRATION

Cloud-Based Software — Seamlessly configure and manage your Access Control program directly within your storEDGE Software from anywhere at any time.

Remote Access Point Management — Storable's cloud-based Access Control software enables operators to remotely respond to Access Control issues by opening or closing your access points without having to be on-site.

INTUITIVE TENANT EXPERIENCE

Access Point Groups — Utilize automation to ensure your tenants only have access to the areas you want them to access—such as 24-hour access to their unit—while preventing access to areas for staff-only.

Automated Delinquency Communications— Empower your delinquent tenants with easy-to-access online payment tools automatically sent to them when they attempt to use an access point.

HARDWARE THAT WORKS

Streamlined Configurations — Eliminate the need for an on-site computer to manage your Access Control program with our easy-to-configure and reliable hardware that puts the control back where it should be—in your facility management software.

Always On — Ensures that your tenants can still access your facility in the face of internet or keypad issues by utilizing a combination of offline access point functionality and improved wiring configuration.

ONE STORABLE, ONE SUPPORT

Industry Expertise — Get the help you need faster with a support team with a deep understanding of storage operators and tenants' unique needs earned from years of exclusively serving the storage industry.

Software & Payments Expertise — Unlock new value between your software, Access Control solution, and the broader Storable Platform with a support team that's knowledgeable across our entire suite of products.
